

## Beautiful soup Cheat Sheet

by wangmz via cheatography.com/61051/cs/15823/

#### **Basic**

```
# https://www.crummy.com/software/BeautifulSoup/bs4/doc/
from bs4 import BeautifulSoup
soup = BeautifulSoup(html_doc, 'html.parser')
soup.title # <title>The Dormouse's story</title>
soup.title.name # u'title'
soup.title.string # u'The Dormouse's story'
soup.title.parent.name # u'head'
#various finder
css_soup.select("p.strikeout.body") # css finder
soup.p # <b>The Dormouse's story</b>
soup.p['class'] # u'title'
soup.a # <a class="sister" href="http://example.com/elsie"</pre>
id="link1">Elsie</a>
soup.find_all('a') # [<a ..>, ..]
soup.find(id="link3") # <a class="sister"</pre>
href="http://example.com/tillie" id="link3">Tillie</a>
for link in soup.find_all('a'):
   print(link.get('href')) # http://example.com/elsi, #
http://example.com/lacie
```

### Search

```
search.pyhttps://www.crummy.com/software/BeautifulSoup/bs4/doc/
#------
# css selector
#------
css_soup.select("p.strikeout.body")
soup.select("p nth-of-type(3)") # 3rd child
soup.select("head > title")
soup.select("p > a:nth-of-type(2)")
soup.select("p > #link1") # direct child
soup.select("#link1 ~ .sister") # sibling
soup.select('a[href]') # existence of an attribute
soup.select_one(".sister")
# attribute value
soup.select('a[href="http://example.com/elsie"]') # exact
attribute
soup.select('a[href*="http://example.com/"]') # negative match
soup.select('a[href*="tillie"]') # end match
```

### Search (cont)

```
soup.select('a[href*=".com/el"]') # middle
#-----
# basic
#-----
soup.find_all('b') # match by tag
soup.find_all(re.compile("^b")) # match by tag
using regex
soup.find_all(["a", "b"]) # match by tag in
# function (complex condition)
def has_class_but_no_id(tag):
 return tag.has_attr('class') and not
tag.has_attr('id')
soup.find_all(has_class_but_no_id)
#-----
# find_all_api
#-----
find_all(name, attrs, recursive, string, limit,
**kwargs)
soup.find_all("title") # tag condition
soup.find_all("p", "title") # tag and attr
# [<b>The Dormouse's
story</b>]
soup.find_all("a")
# keyword arguments
soup.find_all(id="link2")
soup.find_all(href=re.compile("elsie"),
id='link1')
soup.find(string=re.compile("sisters")) # text
contain sisters
# css class (class is researved keyword)
soup.find_all("a", class_="sister")
```

#### Make soup

```
soup = BeautifulSoup(open("index.html"))
soup = BeautifulSoup("<html>data</html>")
```

# Beautiful soup Cheat Sheet

by wangmz via cheatography.com/61051/cs/15823/

#### Output

```
# HTML
soup.prettify() #pretty print
str(soup) # non-pretty print
# String
soup.get_text() #all text under the element
```

#### **Encoding**

```
#output
soup.prettify("latin-1")
tag.encode("utf-8")
tag.encode("latin-1")
tag.encode("ascii")
```

#### **Navigation**

```
#-----
# going up/down/side
#-----
# ----- going down -----
soup.head# <head><title>The Dormouse's story</title>
