Title: Exercise 08 Filtering and Sorting Data

Name: Justin Chong

IC Number: 960327-07-5097

Date: 27/6/2023

Introduction: Practicing with Pandas in filtering and sorting data in this exercise.

Conclusion: I have become a lot better in filtering and sorting data using Pandas.

Ex08 - Filtering and Sorting Data

This time we are going to pull data directly from the internet.

Step 1. Import the necessary libraries

In [5]: ▶ import pandas as pd

Step 2. Import the dataset from this address

(https://raw.githubusercontent.com/guipsamora/pandas exercises/master/02 Filtering %26 Sort

Step 3. Assign it to a variable called euro12.

Step 4. Select only the Goal column.

```
In [56]: ▶ | euro12[['Goals']]
    Out[56]:
                   Goals
                      4
                0
                       4
                       4
                       5
                       3
                      10
                       5
                       2
                       6
               11
               12
                      5
               13
                      12
               14
               15
                       2
```

Step 5. How many team participated in the Euro2012?

Step 6. What is the number of columns in the dataset?

```
In [24]: | len(euro12.columns)
Out[24]: 35
```

Step 7. View only the columns Team, Yellow Cards and Red Cards and assign them to a dataframe called discipline

[30]: N	<pre>discipline = euro12[['Team', 'Yellow Cards', 'Red Cards']] print(discipline)</pre>						
		Team	Yellow Cards	Red Cards	S		
	0	Croatia	9	0	0		
	1	Czech Republic	7	0	0		
	2	Denmark	4	0	0		
	3	England	5	0	0		
	4	France	6	0	0		
	5	Germany	4	0	0		
	6	Greece	9	1	1		
	7	Italy	16	0	0		
	8	Netherlands	5	0	0		
	9	Poland	7	1	1		
	10	Portugal	12	0	0		
	11	Republic of Ireland	6	1	1		
	12	Russia	6	0	0		
	13	Spain	11	0	0		
	14	Sweden	7	0	0		
	15	Ukraine	5	0	0		

Step 8. Sort the teams by Red Cards, then to Yellow Cards

In [39]:	disci	pline.sort_values	(['Red Cards'	', 'Yellow Cards'], ascending=False)	
	7	Italy	16	0	•
	10	Portugal	12	0	
	13	Spain	11	0	
	0	Croatia	9	0	
	1	Czech Republic	7	0	
	14	Sweden	7	0	
	4	France	6	0	
	12	Russia	6	0	
	3	England	5	0	
	8	Netherlands	5	0	
	15	Ukraine	5	0	
	2	Denmark	4	0	
	5	Germany	4	0	

Step 9. Calculate the mean Yellow Cards given per Team

```
In [43]: ► discipline['Yellow Cards'].mean()
Out[43]: 7.4375
```

Step 10. Filter teams that scored more than 6 goals

Step 11. Select the teams that start with G

```
In [66]:  euro12[euro12['Team'].str.startswith('G')]
    Out[66]:
                                                                      Total
                                                                                                                     Saves-
                                   Shots
                                          Shots
                                                                                                Penalties
                                                 Shooting
                                                           Goals-
                                                                      shots
                                                                                   Hit Penalty
                                                                                                             Saves
                                                                                                                        to-
                                                                                                                            Fouls
                                                                                                                                       Fou
                      Team Goals
                                             off
                                      on
                                                                                                     not ...
                                                 Accuracy
                                                              to-
                                                                       (inc.
                                                                            Woodwork
                                                                                         goals
